Motion™ LS800 Tablet PC

A high-powered Tablet PC *can* come in a very small package.

The LS800 is a revolutionary addition to Motion Computing's award-winning Tablet PC series with its unique size and remarkable power. About the size of a paperback, the LS800 Tablet PC comes equipped with Intel® Centrino™ Mobile Technology for outstanding mobile performance and productivity. With the Intel® Pentium® M Processor ULV 753 (1.20GHz), Intel® 915GMS chipset with embedded graphics, integrated high-speed wireless and DDR2 400MHz memory technology, the LS800 gives you the freedom to enjoy true, ultra-mobile computing.

At 2.2 pounds, this lightweight Tablet PC is exceptionally durable. That means you can bring Tablet PC productivity into new and diverse environments for the very first time. Not only great for highly-mobile office use, the LS800 is equally at home at a warehouse or construction site, on an all-day delivery or service route, on hospital rounds or in patient consultations.

The LS800 redefines mobile computing and creates a new category of Tablet PCs – the Ultra-Mobile Slate. This new concept in pure slate design provides all the power of a full-size Tablet PC, yet it can be held comfortably in one hand. With its 8.4" display, array of wireless capabilities and full-performance Microsoft® Windows® XP Tablet PC operating system, only Motion offers a Tablet PC this compact, this versatile and ultimately this mobile. The innovation is from Motion Computing, but the freedom is all yours.

Unequaled Innovation in today's smallest, lightest Tablet PC

Take a closer look at this one-of-a-kind Tablet PC. The LS800 Tablet PC measures just 8.94" by 6.69" by 0.87", and weighs 2.2 pounds. It's easier to use, stow or transport than any Tablet PC available today and will easily fit in a lab coat pocket or purse.

For the first time ever, experience all the advantages of a full-strength operating system in an ultra-mobile platform. The LS800 is the smallest, most compact Tablet PC to offer full Microsoft Windows XP functionality. So, unlike a PDA or other handheld devices, it easily runs any Windows XP-compatible application. That advantage eliminates the cost of porting enterprise applications to an incompatible mobile system.

Just like Motion's full-size Tablet PCs, the LS800 features Motion's Speak Anywhere® audio technology which lets you record, dictate or program voice commands easily - even in the noisiest locations. The beam-focused, dual-array microphones clearly record your audio notes or recognize your voice commands, while suppressing background noise and providing echo cancellation. You can even use your LS800 as a telephone using Voice over IP networking - thanks to Motion's outstanding innovations in audio technology.

Amazing Productivity, literally at your fingertips

The Motion LS800 retains all the cutting-edge technologies you expect from much larger mobile systems. Powered by Intel Centrino Mobile Technology, the LS800 delivers exceptional mobile performance that handles your toughest applications. Featuring the latest Intel mobile processors, leading-edge graphics performance and advanced wireless connectivity, the LS800 rivals most laptops and desktops alike. And the 8.4" no-compromise SVGA display provides a superb Windows XP Tablet PC experience.

Use the LS800's digital ink capabilities and be amazed at how pen input will revolutionize the way you work. Take notes, annotate forms, gather a client signature and use all of your standard office productivity applications. Start writing with the ergonomically designed digitizer pen and you'll want to take advantage of every feature that the LS800 and Microsoft Windows XP Tablet PC Edition have to offer.

The LS800 keeps you connected and productive with integrated high-speed 802.11 wireless, Bluetooth® and IrDA connectivity. Two on-board USB ports and a Secure Digital slot lets you connect your LS800 to a Motion DVD/CD-RW optical drive, a barcode scanner, camera and a wide variety of special purpose peripheral devices. Motion's accessory options offer extensive expansion capabilities to meet your mobile computing needs no matter what business you are in.

As with all award-winning Motion Tablet PCs, the LS800 can be transformed into a full-featured desktop system. Slip the LS800 into the compact MobileDock and connect to a full-size display, keyboard and other accessories. The MobileDock not only powers the LS800 and charges the battery, it provides two additional USB ports and Ethernet connectivity. Don't let the size fool you. This is the only PC you need.

Advanced Security is key to advanced mobile computing

Motion is committed to ensuring safe, out-of-the-box computing. The LS800 Tablet PC delivers the latest security advancements, offering all the protection you could ask for.

The Motion Dashboard brings all of the LS800 security applications and features into a single, user-friendly interface so you can easily configure the right level of protection to meet your individual needs.

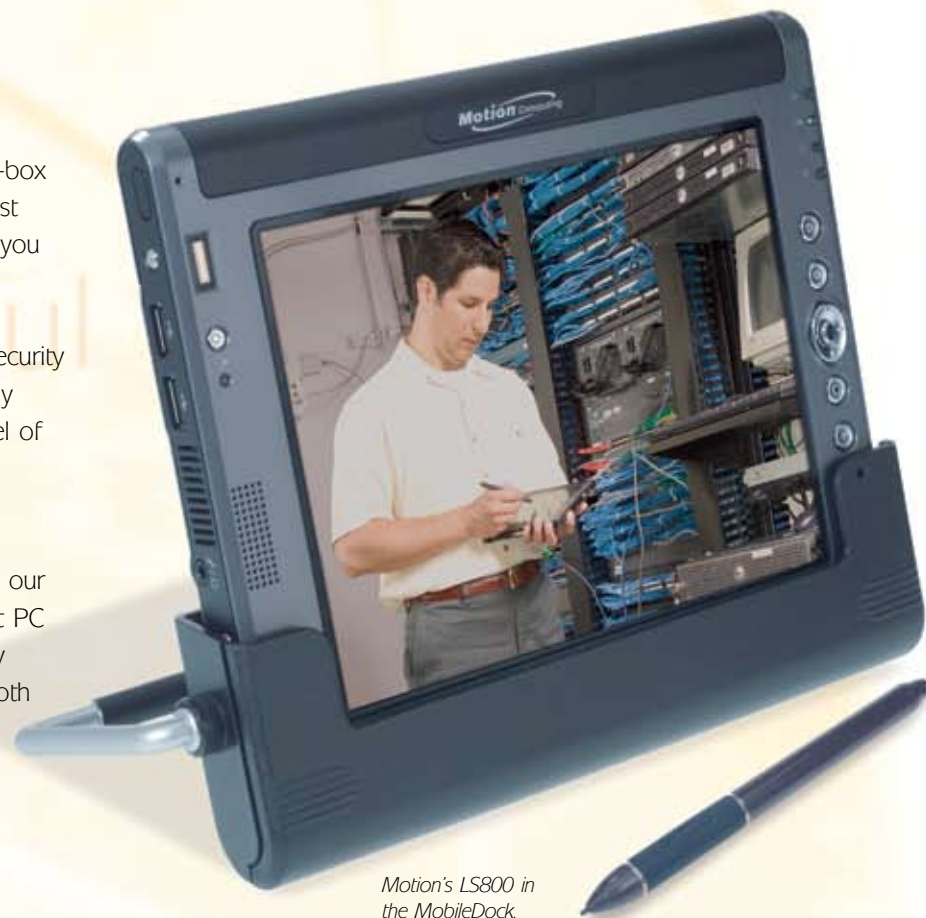

Your data will be safely protected by our new embedded Trusted Platform Module (TPM), while our integrated Fingerprint Reader protects your Tablet PC and data from unauthorized use. For high-security environments, you can disable the 802.11, Bluetooth and IrDA connections when necessary.

Durability and Design should go hand in hand

Advanced ergonomics make the LS800 Tablet PC easy to handle, efficient and completely balanced. The LS800 is encased in a highly durable, lightweight carbon fiber housing complete with a metalized coating that provides additional toughness. The advanced 1.8" hard-disk drive is not only thin and light, but has been proven to significantly reduce the risk of shock-induced failures. Plus, the slate design itself offers superior display protection versus convertible-type Tablet PCs.

And for those who work in more diverse environments, the LS800's Motion Bump Case was designed to provide additional protection against everyday bumps and scrapes. Feel free to take this super compact Tablet PC to places where a laptop or convertible just can't go.

The LS800 Tablet PC inspires mobility - you'll want to see this remarkable innovation for yourself. Count on Motion Computing for smart mobile computing products that keep you ahead of the game.

Motion's LS800 in the MobileDock

LS800 Accessories

Get full desktop functionality from your LS800 Tablet PC.

Full-function Desktop Mode

The lightweight, compact **MobileDock** is a versatile, all-in-one docking solution that includes a docking cradle, dock base and travel stand. This is an ideal accessory for using your LS800 Tablet PC in the office or while traveling. Combined with a **Wireless Keyboard**, full-size display and other accessories, the MobileDock transforms your Tablet PC into a full functioning desktop system. Add a **USB DVD/CD-RW** drive or your favorite USB accessory and expand your functionality. (**USB Keyboard** also available.)

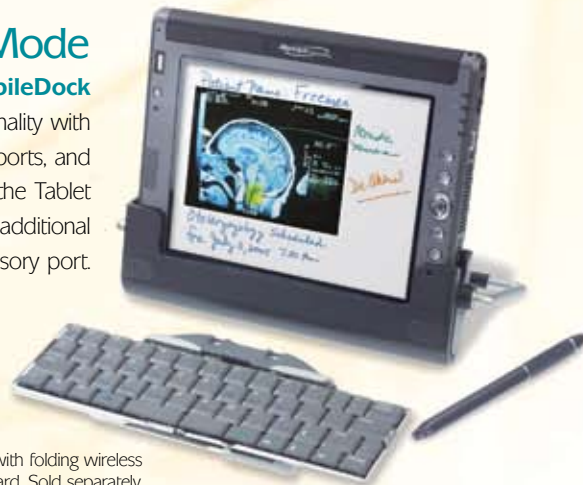

Notepad Mode

When used in Notepad mode (inset), the LS800 is easily repositioned for easy **Pen** input. (Shown with dock base attached.)

Travel Mode

Attach the slim, lightweight travel stand to the **MobileDock** docking cradle and take all of the LS800 functionality with you. The MobileDock replicates all of your LS800 ports, and when used with an AC power adapter, powers the Tablet PC and charges the battery. It also provides two additional USB ports and a Motion Accessory port.

Shown with folding wireless keyboard. Sold separately.

LS-Series Mobile Accessories

Take your Tablet PC everywhere with LS800 companion products.

Designed for diverse environments, Motion's **Bump Case** provides additional protection for your LS800 Tablet PC when working in the field. Use the detachable shoulder strap for easy carrying or the integrated easel stand for keyboarding and stationary presentations.

The slim, warm-swappable **Standard Battery** gives you hours of dependable power. Motion's multi-bay **Battery Charger** lets you quickly charge two LS800 batteries simultaneously so you're productive wherever your job takes you. Compatible with LS800 and LE1600 batteries. (Batteries sold separately)

Advanced Capabilities

The Motion **Compact Carrying Case** is ideal for mobile users who prefer to carry a single work case that can hold all of their work materials.

The **Auto/Plane Adapter** plugs into most standard 12-volt automobile or airplane power ports. Operate your LS800 and charge your battery at the same time.

A second **AC Power Pak** provides the convenience of working from multiple locations.

Used with the MobileDock, the **Motion Accessory Cable** connects to the Motion USB DVD/CD-RW drive and is powered by your Tablet PC.

Motion's **Display Cloth** is specifically designed to keep your Tablet PC display clean and dirt free.

Motion's **USB Modem** provides standard modem and fax capabilities, and is the perfect accessory when Wi-Fi is unavailable.
